

Screenshots of INFO5100 Final Project Tests

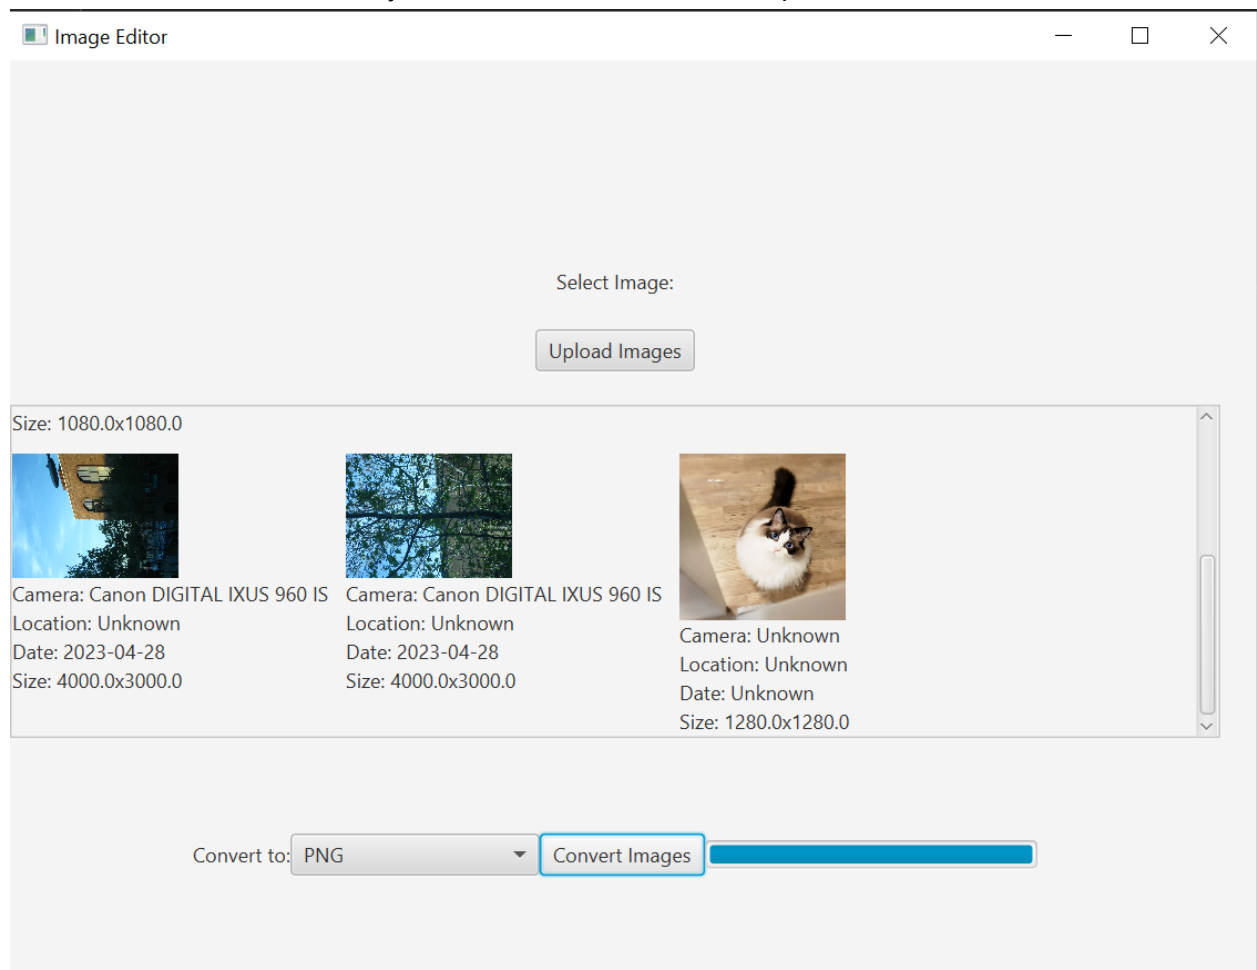

Here are screenshots of the GUI. Users can select images to upload from their desktop/ laptop.

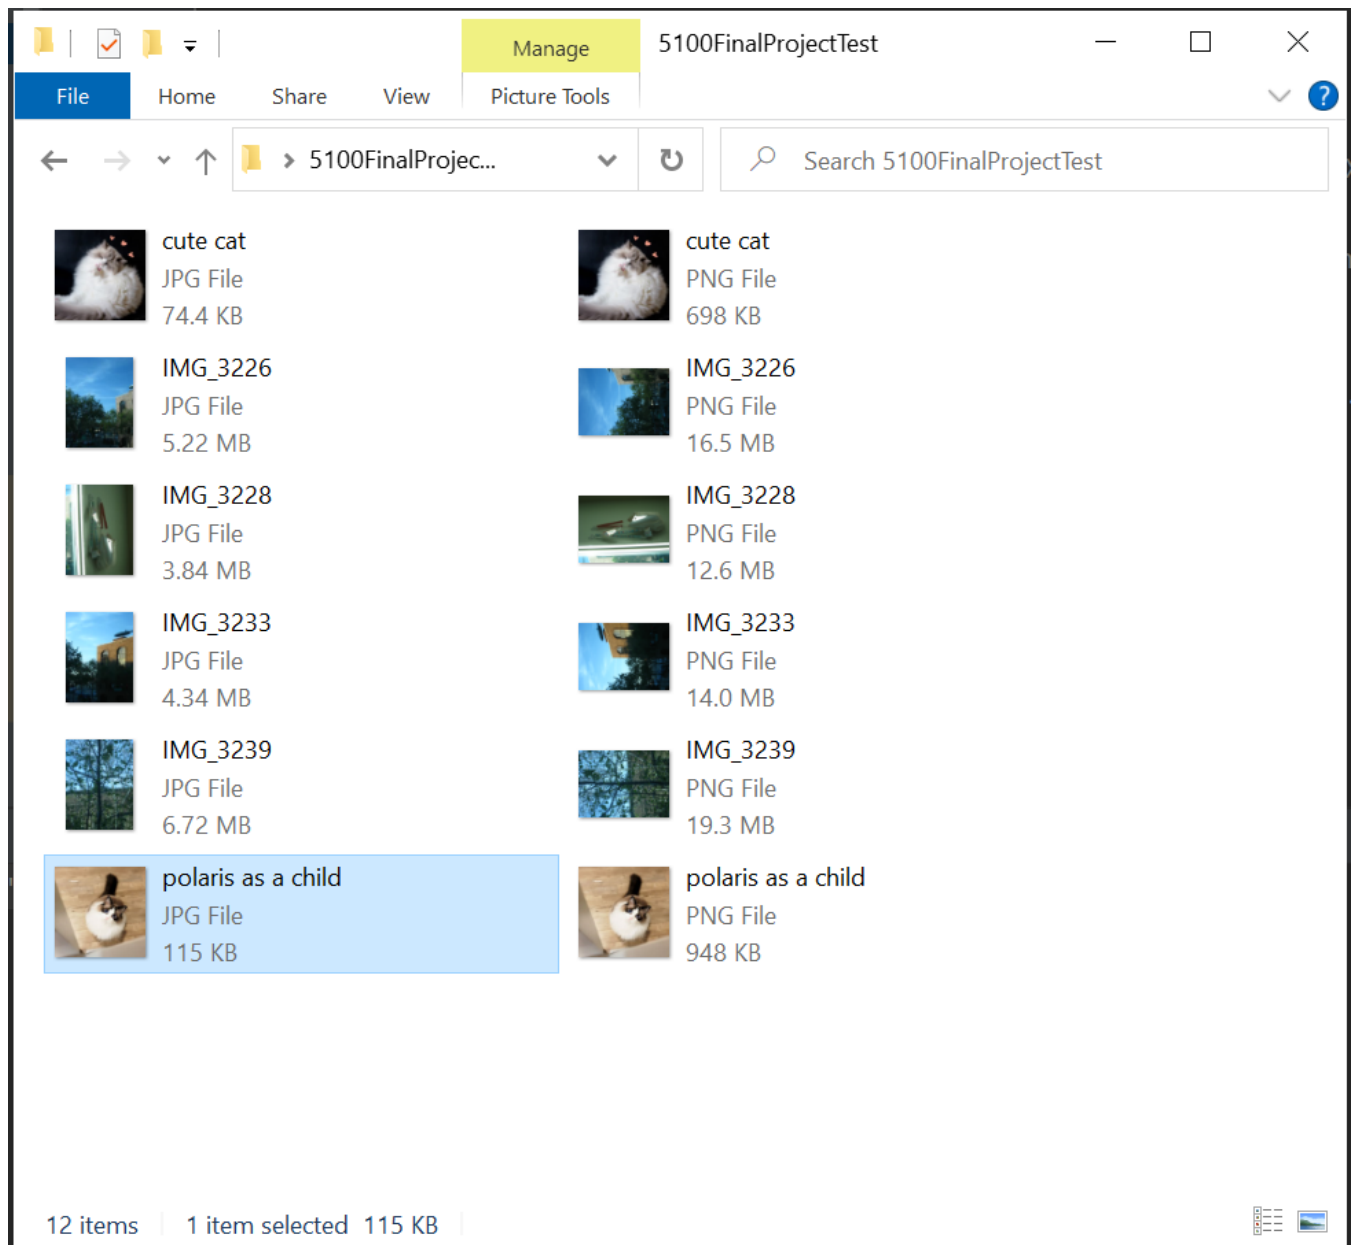

After uploading, the GUI displays thumbnails of the images(100*100), as well as the image properties.

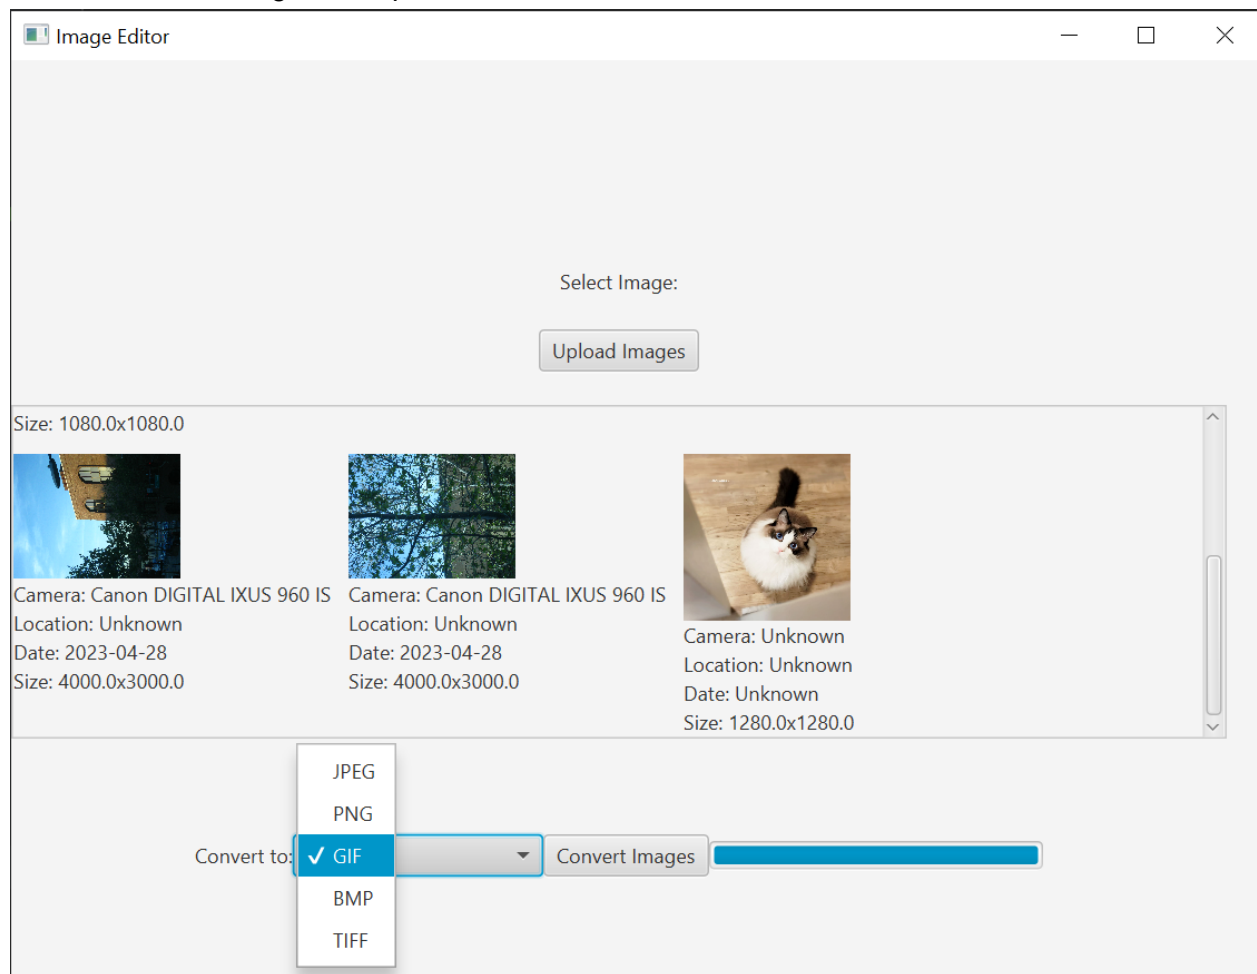

Users can select the form they want to convert to. For example: convert to PNG

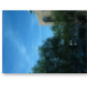

After clicking the Convert Images Button, we can see these pictures are converted to PNG in the file.

Users also can change these pictures into other forms:

Here we can see other converted forms are saved in the file:
